

FLAT CABLE TAPES *for Automotive, Aerospace, Industrial and Consumer Applications*

In today's competitive markets, electronic products must be smarter, smaller, and lighter do more and cost less. Flat cables are essential to meeting the electronic markets drive toward more compactness and higher reliability. Sheldahl Technical Materials make the difference. Our offerings of flat cable tapes are the key component of today's high-performance electronics

Sheldahl's variety of dielectric substrates and adhesives allows customers to find the right mix of characteristics for any application. Comprehensive technical sales support aides customers as they choose — and use — materials. Processing conditions and the elimination of post-cure help speed up production, reduce waste, and control costs.

FLAT CABLE BENEFITS

- Cost-effective interconnect
- Enhanced design flexibility
- Reduced size and weight
- Ease of installation

THE SHELD AHL ADVANTAGE

- Choice of substrates and adhesives
- Choice of width, length and thickness
- Consistent adhesive thickness
- TS 16949 and ISO 9001 Certified
- UL 94 VTM-0*
- Elimination of post-cure*
- Superior technical support
- Over a 40 year history of innovation

* May not apply to all flat cable tape products.
See individual specifications.

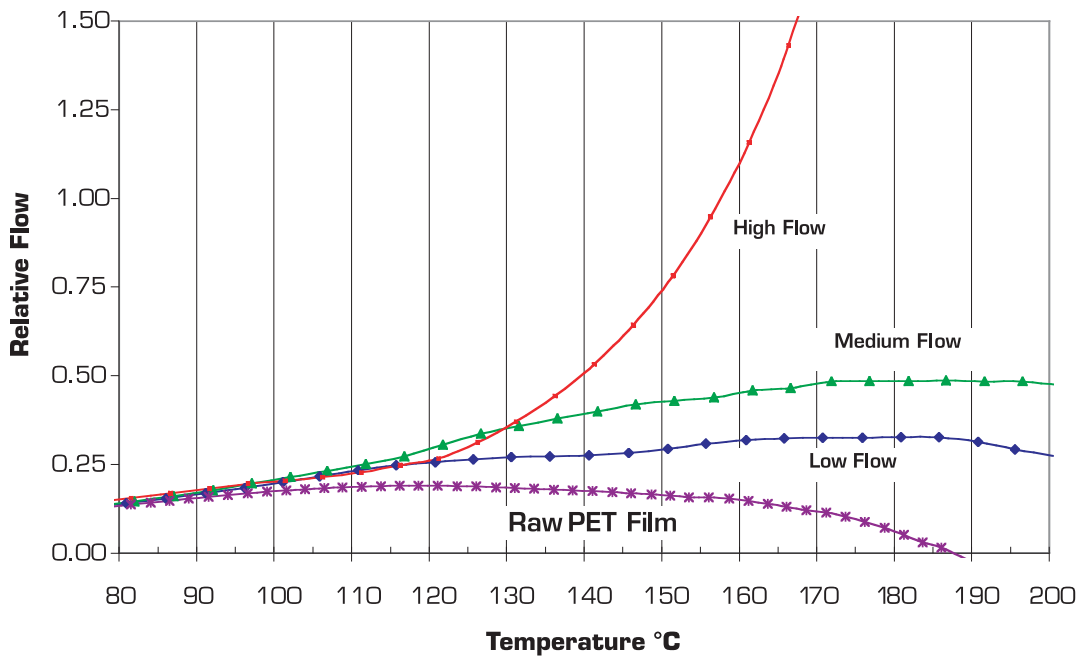

FLAT CABLE TAPES

Product Information

A LINE FOR ANY PURPOSE

	Low Flow (Film type)	Medium Flow (Film type)	High Flow (Film type)
Initial Tack Temperature	96°C	88°C	82°C
Non Flame retardant (Halogen Free)	T1767 (PET)	T9015 (PET)	Please contact Sheldahl for more information
UL 94 V-0	T1694 (PET)	T1963 (PET)	T1871 (PET)
	T9012 (PEN)	T9013 (PEN)	T9009 (PET)
	T1777 (PI)	T9014 (PI)	
	T9024 (Nomex®)	T900171 (Nomex®)	
PBDE Free Flame Retardant	T1929 (PET) T9029 (PEN)	Please contact Sheldahl for more information	
Halogen Free Flame Retardant	Please contact Sheldahl for more information		
Developmental Materials	Please contact Sheldahl for more information
